ACCESSORIES & COMPONENTS

“

*Takler is a group of people who have always had
a single territory of reference over time: the world.*

Free people are those who are not afraid to try, to experiment, to dare.

*They are people who have the courage to take risks
and bring innovation to every field and beyond every border.*

”

Lorenzo Lorusso

CEO

Evolving has always been our way of being. It is the only way to fulfil our commitment: creating innovative solutions to be a step further for efficiency, quality and safety.

Evolvere è il nostro percorso, da sempre. È l'unico modo per restare fedeli alla nostra missione: produrre soluzioni innovative, sempre un passo avanti per efficienza, qualità e sicurezza.

Selbstentwicklung ist immer unser Weg. Es ist der einzige Weg, um unserer Verpflichtung nachzukommen: Innovative Lösungen zu schaffen, die einen Schritt weiter für Effizienz, Qualität und Sicherheit sind.

Progresar es nuestro camino, desde siempre. Es la única manera de permanecer fieles a nuestra misión: producir soluciones innovadoras, siempre un paso adelante hacia eficacia, calidad y seguridad.

Evoluer représente notre chemin depuis toujours. Il est le seul moyen d'être fidèle à notre mission : créer des solutions innovantes, qui soient toujours un pas en avant pour qualité, sécurité et efficacité.

“Skin” and “Knock” are rear aluminium doors. Skin can be mounted on vehicles < 3,5 ton while Knock is suitable for vehicles > 3,5 ton complying with UNI EN 12642 XL certification, for over 32 tons.

“Skin” and “Knock” are sold in handy Kits, easy and simple to assemble. All components are already drilled and cut at the desired dimension, ready for assembly. Furthermore, Takler supplies spare parts for every component, for a quick replacement in case of damage.

Skin e Knock sono le porte posteriori in alluminio. La Skin è adatta al montaggio su veicoli < 3,5 ton, mentre la Knock è testata su veicoli > 3,5 ton con certificazione UNI EN 12642 XL superando la prova di resistenza a 32 tonnellate.

Skin e Knock sono vendute in pratici kit assemblabili in modo semplice e veloce. Tutti i pezzi che le compongono sono già forati e tagliati nella misura desiderata, pronti per il montaggio. Inoltre Takler fornisce ricambi per ogni componente, facilitandone la sostituzione in caso di danneggiamento.

Skin und Knock sind Aluminium-Hecktüren Skin kann an Fahrzeuge < 3,5 Tonnen montiert werden, während Knock ist für Fahrzeuge > 3,5 Tonnen geeignet, beiden Ausführungen haben die UNI EN 12642 XL Zertifizierung, und den Ausdauerfest von 32 Tonnen bestanden.

Skin und Knock werden als praktischer Aufbausatz verkauft. Alle Teile sind bereits auf die gewünschte Maßeinheit vorgebohrt und zugeschnitten, fertig zur Montage. Darüber hinaus liefern wir alle Ersatzteile, die den Austausch im Schadensfall vereinfachen.

Portes en aluminium

Skin y Knock son nuestras puertas traseras de aluminio.

La versión Skin es adecuada al montaje de vehículos < 3,5 ton, mientras que la Knock pasa conforme con vehículos > 3,5 ton de certificación UNI EN 12642 XL, superando la prueba de resistencia para 32 toneladas.

SKin y Knock son ofrecidas en un práctico Kit, el cual se puede montar en un modo simple y veloz, todos los componentes vienen ya perforados y cortados a la medida deseada, listos para el montaje. Ofrecemos las piezas de recambio de cada uno de los componentes de las puertas, para un rápido remplazo en caso de daño.

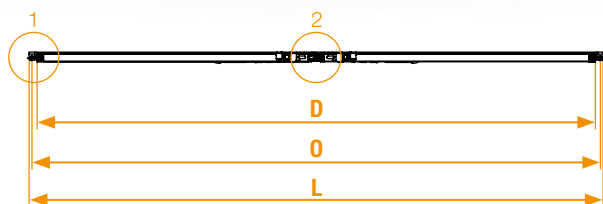

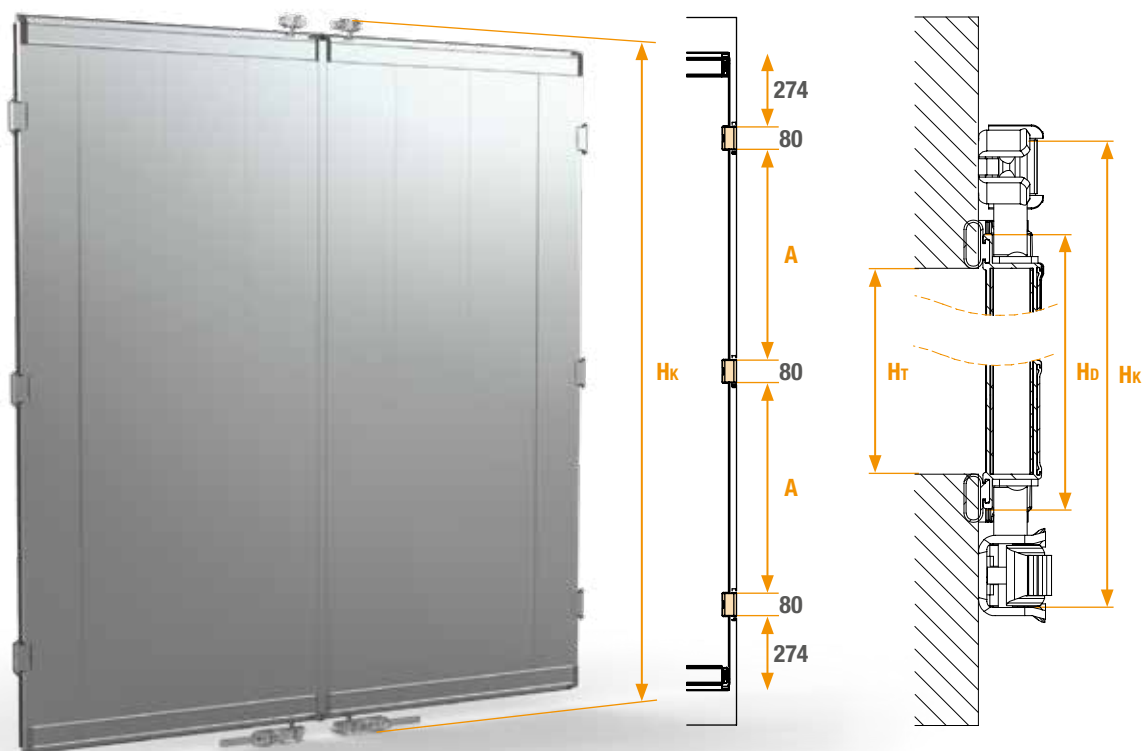

Skin et Knock sont les deux types de portes arrière en aluminium.

La Skin peut être montée sur les véhicules < 3,5 tonnes, tandis que la Knock est testée sur les véhicules > 3,5 tonnes selon la norme UNI EN 12642 XL ayant passé avec succès le test de résistance de 32 tonnes.

Skin et Knock sont fournis en kits pratiques, à assembler de façon simple et rapide. Tous composants sont déjà percés et coupés à la mesure souhaitée, prêts pour le montage.

Takler fournit les pièces de rechange de tous composants, en facilitant la substitution en cas d'endommagement.

Outfitting light vehicles gets easier with Takler's new aluminium locks, Klever. Practical and light, they come in several types, permitting the sideboards to be safely and quickly closed. Currently available in different heights, with plastic or steel handle.

Takler agevola l'allestimento di veicoli leggeri, grazie alla sua nuova produzione di montanti in alluminio Klever. Pratici e leggeri, in più varianti, permettono la chiusura delle sponde in modo rapido e sicuro. I Klever sono disponibili in diverse altezze, con possibilità di scelta tra maniglia in plastica o in acciaio.

Mit den neuen Aluminiumverschlüssen Klever von Takler wird die Ausrüstung von leichten Nutzfahrzeugen einfacher. Praktisch und leicht, gibt es sie in verschiedene Ausführungen, mit denen sich die Bordwände sicher und schnell verschließen lassen. Die Klever sind in verschiedenen Höhen, mit Kunststoff oder Stahlgriff erhältlich.

Aluminium locks for sideboards

Montanti in alluminio per sponde
Bordwandverschlüsse aus Aluminium
Cierres de cartolas en aluminio
Fermetures de ridelles Aluminium

Takler agiliza las operaciones de carrozado de vehículos ligeros, gracias a los cierres en aluminio Klever. Prácticos y ligeros, en varias tipologías, permiten el cierre de cartolas de manera rápida y segura.

Los Klever son disponibles en diferentes alturas, con posibilidad de poner asa en plástico o en acero.

Takler facilite le carrossage des VUL, grâce à la nouvelle production des fermetures de ridelles en aluminium: Klever. Pratiques et légères, avec plusieurs variantes, permettent la fermeture des ridelles d'une façon rapide et bien sécurisée.

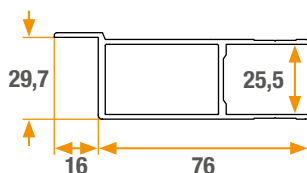

Nos Klever sont disponibles en différentes hauteurs, avec poignée en plastique ou en acier.

Takler's lateral protection device is available in aluminium, plastic or ZM steel and complies with European and Extra-European homologation rules, both in terms of functionality and safety. Its accessories and components perfectly match a contemporary design since they are suitable to every fitting solution.

I dispositivi di protezione laterale Takler sono disponibili in alluminio, plastica o acciaio ZM e rispondono alle normative di omologazione Europee ed extra Europee riuscendo a soddisfare ogni esigenza tecnica e di sicurezza. I suoi accessori e componenti sposano al meglio le configurazioni del design contemporaneo perché compatibili con ogni soluzione allestitiva.

Takler Seite Anfahrerschutzvorrichtung in Aluminium, Kunststoff oder Zink-Magnesium erhältlich und erfüllen die europäischen und nicht europäischen Homologations standards, sowie alle technischen und Sicherheitsanforderungen. Die Zubehörteile und Komponenten passen am besten zu den Konfigurationen des zeitgenössischen Designs, da sie mit jeder Installationslösung kompatibel sind.

Our goal is to offer the world market a range of completely customizable ladders, that make the vehicles comfortable and safe. It is possible to choose among pullout, rotating, suspended, foldable and sliding ladders, each of them specifically conceived for different situations of loading and unloading.

Il nostro obiettivo è offrire al mercato mondiale una gamma totalmente personalizzabile di scalette d'accesso che rendano i mezzi comodi e sicuri. È possibile scegliere tra scalette estraibili, girevoli, ribaltabili, ripiegabili, sospese, ognuna dedicata a particolari esigenze di carico e scarico.

Unser Ziel ist es, Weltweit komplett personalisiert Leitern anzubieten, die die Fahrzeuge komfortabel und sicher machen soll. Es ist möglich, zwischen Ausziehbaren, Drehbaren, Klappbaren, Freistehenden Leitern zu wählen. Jede Leiter wurde speziell ausgedacht, um bestimmte Be- und Entladungsbedürfnisse zu entsprechen.

Trittleiter

Escabeaux

Escaleras

Nuestro objetivo es ofrecerle al Mercado mundial una gama de escaleras completamente personalizables, con la cual el vehículo pueda ser cómodo y seguro. Es posible elegir entre diferentes modelos, el extraíble, rotatorio, suspendido, volcable, escamotable, cada uno de éstos concebidos precisamente para las diferentes situaciones de carga y descarga.

Notre objectif est celui d'offrir au marché mondial une gamme complètement personnalisable de marche pied d'accès qui rendent les moyens commode et surs. Nous proposons une vaste gamme au choix parmi ceux extractibles, pivotants, rabattables, repliables, suspendus, chacun adaptés à des particulières exigences de chargement ou de déchargement.

Takler's wheel carrier is available for single and double wheel, welded or disassembled with the different components along with its self-locking handle and zinc-nickel coated, that prevents corrosion.

Il portaruota Takler è disponibile con alloggiamento singolo o doppio, con struttura saldata o con componenti separati pronti al montaggio; completa il prodotto il manettino a leva trattato con zinco-nichel sigillante che previene e combatte la corrosione.

Taklers Ersatzradkorb ist in einzelner und doppelter Ausführung vorhanden, geschweißt oder mit Schrauben montierbar erhältlich. Die Halterung ist mit einer Schraubensicherung ausgestattet und ist Zink-Nickel beschichtet, um Korrosionen zu vermeiden.

The catalogue has been enriched with flat tracks along with traditional ones, to satisfy new professional needs that require full capacity and minimum occupied space. Our tracks are produced in aluminium or steel and guarantee high reliability during demanding operations of loading and transport.

Accanto alle guide fermacarico tradizionali il catalogo si è arricchito di guide piatte per soddisfare le nuove esigenze professionali che richiedono massima capienza e minimi ingombri. Le nostre guide sono prodotte in alluminio o acciaio e garantiscono grande affidabilità durante prestazioni impegnative di carico e trasporto.

Neben der standard Zurrschienen wurde der Katalog mit Flachprofilen erweitert, um die neuen Anforderungen zu erfüllen, die die maximale Kapazität und minimale Abmessungen erfordern. Unsere Ausführungen bestehen aus Aluminium oder Stahl und garantieren hohe Zuverlässigkeit bei anspruchsvollen Lade- und Transportsicherung.

Guide fermacarico

Ladungssicherung-Zurrschienen

Rails d'arrimage

Perfil horizontal de carga

El catálogo se ha ampliado con los rails planos adjuntándose a los tradicionales, para satisfacer las nuevas exigencias profesionales que requieren la máxima capacidad y el mínimo espacio ocupado. Nuestros rails se producen en aluminio o acero y son garantía de alta fiabilidad durante las delicadas operaciones de carga y transporte.

Avec les rails d'arrimage traditionnels notre catalogue s'est enrichi de rails d'arrimage plats afin de satisfaire les nouvelles exigences professionnelles qui demandent la possibilité d'exploiter le maximum du volume à l'intérieur du caisson avec un minimum d'encombrement. Nos rails sont réalisés en aluminium ou en acier, et ils assurent un haut niveau de fiabilité durant d'importantes prestations de chargement et de déchargement ainsi durant le transport.
